

*Town of Lexington*  
**Department of Public Works**  
**Engineering Division**

January 14, 2013

Dear Lexington Resident:

The Town of Lexington seeks to improve pedestrian, bicycle and vehicular traffic safety as well as improve traffic operations along a section of Massachusetts Avenue in Lexington. The project area is approximately 3,500 feet long and extends from Pleasant Street to Marrett Road.

We value your opinions, very highly; and we have scheduled informational workshops to solicit input and bring interested parties together to build and achieve project consensus. These workshops will focus on identifying project components and issues such as the safety and welfare of the vehicular, bicycle and pedestrian traffic as well as impacts to abutting properties. This project's success can only be achieved with the community's collective input.

We ask that you invest some of your valuable time to provide your thoughts and influence to make this project successful for the community and for future generations. We appreciate your assistance and commitment to your community.

A workshop was held on Thursday, November 8, 2012 and based on input at this meeting, and other meetings the proposal has been revised. A second workshop is scheduled for February 6, from 7:30 to 9:30 PM in Cary Hall, 1605 Mass Ave., Lexington, MA. The modified proposal will be on display at this meeting.

If you have any questions or concerns please contact me directly.

Sincerely;  
Dave Cannon P.E.  
Assistant Town Engineer  
Town of Lexington, MA
